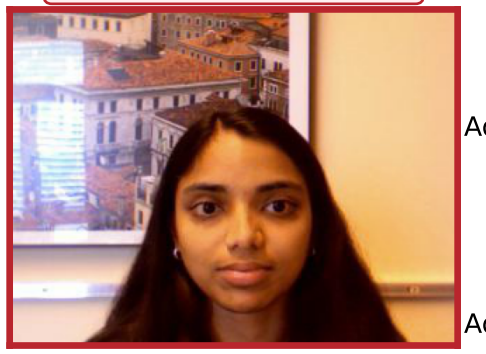
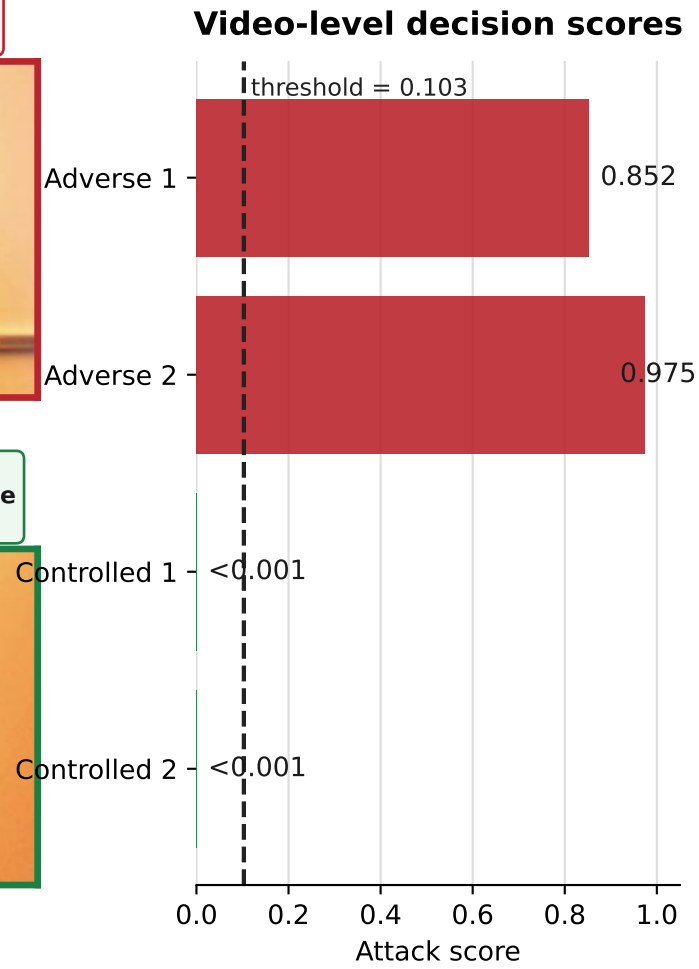
Bona fide client014: adverse illumination increases attack scores

All four videos are bona fide. Red panels are false positives: only adverse-illumination trials cross the attack threshold.

Adverse 1 - False positive
GT: bona fide | Pred: attack
Attack score=0.852

Adverse 2 - False positive
GT: bona fide | Pred: attack
Attack score=0.975



Controlled 1 - Correct
GT: bona fide | Pred: bona fide
Attack score=0.000


Controlled 2 - Correct
GT: bona fide | Pred: bona fide
Attack score=0.000
